The team has young innovative minds and our mission is to empower our clients business with our exclusive recruitment solutions. This team has delivered very high success ratio through our in-house recruitment portal.

“Empowering Business”

Benefits of ManPower Outsourcing

- No recruitment hassles for the client company
- Replacement whenever consultant is on leave or resigns (with prior notice from each side)
- Reduce overheads, free up resources
- Minimize capital expenditure
- Free your executive team from day-to-day process problems
- Save on manpower and training costs
- Improve speed and service
- Provide the best quality services, products and people
- Avoid the cost of chasing technology
- Reduce the overall management burden while retaining control of strategic decision making.

Staff Augmentation Services

Code Platter understands the staffing needs of clients for their urgent, short term and long term projects on various technologies and hence provides best talent available in-house and from the industry. We offer following recruitment methods:

Contractual - It provides flexibility, cost and time saving on consultant cost.

Contract to hire - It provides effective consultant for clients and a safe alternative for permanent staffing.

Permanent Staffing - It caters long term staffing needs of an organization.

Dedicated Staffing - It gives access to one or a team of skilled consultants working exclusive on your projects.

“Delivering
Excellence”

JobGully Effect

Code Platter has developed niche recruitment portal keeping in mind the various activities and challenges involved in a recruitment selection process. This portal is being tested and used by in-house recruitment team. It has an exclusive database of 50 thousand quality IT and Non-IT professionals. JobGully regular campus programs and workshops across the country help to build more and more fresh resumes everyday. This recruitment software has been appreciated by industry experts for its exclusive features. As it is gaining popularity in the initial survey, we are planning to launch an open version of JobGully for jobseekers and employers.
